

LOGGING INTO MUBASHER PRO

Double click the Mubasher pro icon which will launch the platform:

Soon after, a small window will open, prompting you to enter your username and password so you can login:

You can also use a virtual keyboard to input your username and password.
You can also choose to remember your Username for quicker access and logging in at a later date.

Once done, the platform should begin to load and the process could take anywhere from 30 seconds up to around 2 minutes depending on the specs of the computer used as well as the speed of the internet connection in place.
To make sure the platform is connected and available for trading, make sure the price feed and Trade fields are both connected by checking the bottom of the platform:

Also, the bottom of the platform should have a running time which is another way of verifying that the platform is up and running:
